

Antihemorrhoidal Cinfa Ointment

COMPOSITION:

Each gram contains:

Hydrocortisone acetate.....	25mg
Neomycin sulphate	5mg
Benzocaine.....	15mg
Tannic acid.....	10mg

The combination of hydrocortisone (corticosteroid with topical anti-inflammatory and anti-allergy action), neomycin (broad spectrum antibiotic), tannic acid (astringent, haemostatic) and benzocaine (anaesthetic, antipruritic) provides an effective formula for the symptomatic treatment of the discomfort caused by haemorrhoids.

INDICATIONS:

For the symptomatic relief of the discomfort with external and internal haemorrhoids, fissures, fistulars, ulcers and itching.

METHOD OF USE:

For anorectal use only.

In general, two daily applications are recommended by the cannula enclosed to the tube if needed.

CONTRAINDICATIONS AND PRECAUTIONS:

- Do not use Antihemorrhoidal Cinfa Ointment if you are allergic to any of the ingredients of the medicinal product.
- Patients should comply with the prescription, especially those who receive oral or parenteral corticosteroids, and those who need prolonged treatment.
- Athletes are informed that this drug contains a component that can test positive in an analytical test for doping.
- If you are pregnant or under breast-feeding, consult your doctor or pharmacist before use this medicine.

INCOMPATIBILITIES AND INTERACTIONS

None described.

POSSIBLE SIDE EFFECTS

None described.

OVERDOSE AND ITS TREATMENT

There is no clinical experience of severe poisoning. In the event of overdose or accidental ingestion, immediately go to see a doctor or to the emergency service of the nearest hospital.
